

New enrolment conditions and selection criteria in the event of limited enrolment 2028/2029

Conditions for enrollment:

Enrollment in the third-cycle doctoral program in Industrial Engineering is open to candidates who:

- have completed a second-cycle degree program (or a comparable program abroad) and
- have, prior to enrollment, selected a research advisor at the Faculty of Economics and Business, or at the Faculty of Civil Engineering, Traffic Engineering and Architecture, or at the Faculty of Mechanical Engineering at the University of Maribor, defined a specific research area within which they intend to conduct research, and prepared a draft doctoral study plan.

Selection Criteria in the Event of Limited Enrollment

In the event of limited enrollment, candidates will be selected based on:

- academic performance in previous studies (average grade including the final thesis): 50%,
- feasibility of the individual tentative doctoral study program (assessed through an interview): 50%.
